

Your Mobile Tours Just Got Gyro Power!

Tilt, pan and move interactively through panoramas and scenes within picatour Fusion Gyro-Enabled mobile tours.

The picatour Fusion virtual tour platform combines **high definition** still images, interactive panoramic images and captivating **full motion video** into one **lightning fast**, rich media presentation...even on your iPad, iPod or other device!

Viewers can now use their iPad, iPhone or iTouch to steer their way through rooms in a stunning, picatour Fusion, interactive, virtual tour. It's amazing!

Your viewers are in charge, it's their time, their tour with your branding all over it. Put them in the driver's seat as you guide them through your listings.

Mobile Virtual Tours – Now is the time!

QR Code with EVERY Exposure Engine Order

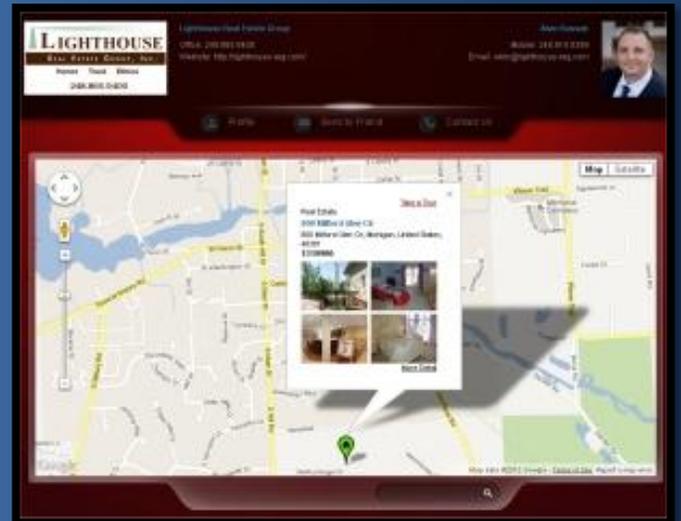

Use our QR code on all of your print materials so potential customers are just a click away from your virtual tour. Fusion will even show you each week how many people have scanned your QR code!

Amazing!

The Map Widget

Be sure to ask for your Fusion Map Widget. We'll give you a snippet of code to put on your website that will allow your visitors to easily search through all of your virtual tours listing using a powerful google map interface. Users can filter the map by listing price, amenities, listing status and more. You'll love this feature once you see it in action on your website!

Tiny Tour URL's

So many of you have told us that you would like an alternative to having to purchase a single property website and also still use a smaller URL to point to your virtual tour so we have listened to you. We're proud to now offer you a secondary virtual tour link with your virtual tour at no additional charge. Your tour URL will look something like www.TinyTURLS.com/Tour# and it is very simple to use and also easy to remember. You can use this to tweet your virtual tour and also use it in print. Track your visits on your hit reports each week to see how many people are using your special short link from your targeted marketing campaigns.
